

2. By placing the Match Load gently onto a Robot from the drive Team Member's Alliance.
- \* The Robot must be contacting the Match Load Zone or the Match Load Bar

Note: During the Autonomous Period, and during the time Between Autonomous and Drive Controlled Periods, Match Load Triballs may not cross the plane of the field perimeter.

<SG7> Possession is limited to 1 Triball. Robots in Violation of this rule must immediately stop all Robot actions except for attempting to remove the excess Triballs.

The intent of this rule is not to punish Robots for pushing Triballs that are in their way; that is, Robots are free to incidentally drive through Triballs on the field while possessing a Triball.

16/6

<SG8> Stay out of your opponent's Goal unless they are Double-Zoned. During the time when an Alliance meets the definition of Double-Zoning, opposing Robots are permitted to "break the plane" of the Double-Zoning Alliance's Goal, such as to remove Triballs.

- a. This allowance ends once the Alliance is no longer Double-Zoning.
