

4/7 Diary -(2.2)

Structure

⊙ Joker Robot roller construction. complete the frame, click part (single roller) The front roller part is correct and improve to solve the shaking problem and replace the appropriate parts.

⊙ Kevin: The use of roller models for intra-group confrontation, the tactical strategy is to always stay in the offensive zone, as much as possible the Triball spit into the Goal to get a higher score, and under conditions, the Triballs imported by the other party and launched to the other party's offensive zone for compliance interception. The average number of throws per game is about 12.

Control

★ Be aware to the battery line. 

9/7 Catapult Design

⊙ Kevin: After testing, it was discovered that

project Version 2
