

⑩ Lyric: However, if the roller is directly used to release to the point, the roller will give the Triball an acceleration. So the Triball (Pre-loads) will deviate from the original position. Therefore, we need a plan to ensure our Pre-load Triball can be perfectly place in the target position.

5/10

⑩ Kevin: We can install a rubber band on the side of Robotics arm and installed a gear on the side. In the initial state, the nut column is lefting facing up, and the rubber band is tied on it. In this way, we can replace the Triball.
