

24/11 Diary - 5

Today, we completed the assembly of the main body of the Robot, ensuring the positioning for the catapult. We also finished constructing the elevation structure and the structures for 2 sets of wings.

26/11

Driver's Diary - 1

Today is my first encounter with this Robot. Compared to the previous version, this Robot has undergone chassis acceleration and weight reduction modifications. However, I've noticed that these changes have had
