

## Operation

## ① 1. Qualification

We made a mistake in our tactical selection in the qualification competitions. On the first day we adopted a defensive-offensive mixed method. But the teammates cannot understand it well and due to the lack of offense, we failed to get a good result. So in the second day we change our strategy. We change to the offensive side, seize the attack and control the field and let the teammates to defense.

How to choose the load-way? (1 Triballs/ 4 Triballs)

- ① When there are no Robot defend us, we load 4 Triballs per time to get a higher score as much as possible.
- ② When there is a Robot block the porthole, we load 1 Triball into the Intake roller; and drive our Robot cross the long barrier pole and push the Triball into the Goal.

## ② 2. Elimination

The rubber wheels seize the Triballs and the teammate can defend.
